

Knowing Mathematics Institute

Audience: Classroom teachers, Title I coordinators, mathematics coordinators, and principals

Enrollment: 20–50 participants

With a review of Dr. Liping Ma’s research, small-group discussions, detailed practice, and constructive feedback, this institute will show you how to effectively deliver proven mathematics intervention using ***Knowing Mathematics***. During this two-day training, you will

- ~ Develop a profound understanding of fundamental mathematics
- ~ Review the mathematical content, including strategies, resources, and components, along with the field-test results of the program
- ~ Determine student eligibility for intervention and provide ongoing assessment
- ~ Model instructional strategies and mathematical conversations
- ~ Receive step-by-step instructions on planning and implementation.

Upon successful completion of this institute, you are eligible to teach ***Knowing Mathematics*** in your classroom, coach other teachers, and coordinate the intervention activities in your school or district.

Note: Additional follow-up training and support can be scheduled through **Houghton Mifflin**. See page 22 for more information.
